

February is National Dental Health Month

To salute this occasion, all new patients who make an appointment in February will receive a **FREE BATTERY OPERATED TOOTHBRUSH.**

Consider these latest facts:

- The CDC reported that cavities are on the rise among 2-5 year olds.
 - Dental decay is really a chronic disease, it's more common than any other condition in kids including asthma, diabetes or obesity.
 - In order to prevent dental problems, the AAPD, the American Academy of Pediatrics, recommends scheduling an appointment once your child's first tooth comes in or by age one.
- CALL TODAY** to reserve your child's **FREE** battery operated toothbrush while supplies last, **LIMITED TIME ONLY.**

"Kids are so special so see the specialist"

To schedule an appointment call:

630-1500

Pediatric Dentistry of Eastern Arkansas

Djuana Cartillar, D.D.S.
